

Dynamometric Key

Product Code: KEY-051

The torque screwdriver ensures tightening to a specified torque letting to give the right force to the DAC cell. The screwdriver allows the torque to be set to any value within a range, from 0,2 Nm to 2 Nm. A torque-limiting clutch disengages the screws driver once reached the preset torque. The key can also be usefully to use the key to generate pressure also for indenting the gasket.

TECHNICAL DATA

DIAMETER SCREW	M3 mm
REGULATION RANGE	0,2-2,0 Nm
MATERIAL BODY	Stainless steel
TORQUE LIMITING	Adjusting

HIGHLIGHT

- Easy to use
- Data for indenting
